DETAILED ACTION

Claim Rejections - 35 USC § 102

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kruit.

Kruit shows the method of providing a plurality of tubular cartons with an end opening less than the pitch of the flight bars with the end openings being shown in figs 13, 14. Kruit shows the placement of the erected cartons between flight bars 45. The combined end-opening width is equal to the pitch of the packaging machine as shown in figs 13, 14. The plurality of cartons detachably affixed to one another in a collapsed condition is read on each blank having multiple sections attached to itself (col 5 lines 30+). The facilitating placement of the cartons is read on the container guideway 42 and inserting

2. Applicant's arguments with respect to claims supra have been considered but are moot in view of the new ground(s) of rejection.

Regarding applicants interpretation of pitch and width of the open end, the examiner is reading the claim in a broad context and Kruit meets all the limitations as discussed supra. The combined end opening width is equal to the pitch of the flight bars as shown in figs 13, 14.
